## Summary

I am a web developer with 2 years of experience in building and maintaining applications. Proficient in PHP, JavaScript, and MySQL, with a strong understanding of MVC design patterns and RESTful APIs. Skilled in the use of Laravel and Vue.js frameworks, as well as version control with Git. Able to work independently and in a team environment, and capable of learning and adapting to modern technologies as needed.

## Technologies & Languages

- **Languages:** JavaScript, PHP, Python
- **Frameworks:** VueJs, AlpineJs, Laravel
- **Databases:** MySQL, SQLite, firebase

## Education & Accomplishments

- University of Phoenix AS Cyber Security | October 2023
- Inducted into National Society of Leadership and Success For keeping a 3.88 GPA

## Projects

- Laragigs: A job posting app built with Laravel and Bootstrap. Implemented authentication and CRUD functionality for job postings and user profiles.
- Posty: A short form social media app built with Laravel and Tailwind CSS. Created a responsive and interactive front-end using blade and implemented features such as user authentication, posting, and commenting.
- Ecommerce platform In development: Currently Building an ecommerce platform with functionality to add products with any number of variations and the ability to have specific pricing, images, and inventory for each of the variations of products.

## Work History

### Freelance Software Developer | Self Employed

12/2020 - Present

Picking up small side projects for clients as well as doing volunteer work to provide not for profit charities with web services using a wide range of technologies such as HTML, CSS, Bootstrap, Angular, and Shopify.

### Task Director | E Group LLC

06/2022 - Present

Responsible for leading critical path projects during nuclear plant maintenance periods. Corrected any design and implementation related issues which has resulted in keeping the project on schedule and under budget.
